REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest, in a method for producing a flexion thermoplastic resin hose by allowing a high temperature fluid to flow into the hose to heat the hose, bending the hose, and allowing a cold temperature fluid into the hose to cool the hose, the step of restricting the flow of the high temperature fluid downstream of the hose to pressurize the interior of the hose and bending the hose. Close prior art is Stripe (US Patent 6,287,508), which teaches filling a tubular preform (22) with a heated fluid under pressure, bending the preform with spool elements (46) and circulating a cooling fluid through the preform (column 5, lines 25-66). Stripe does not teach restricting the flow of the high temperature fluid downstream of the hose to pressurize the interior of the hose. See remarks filed 3/19/04, particularly page 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
